DETAILED ACTION

Status of Claims

1. Claims 1-19 are pending.

Claims 1-12 and 17-19 are rejected.

Claims 13-16 are objected.

Information Disclosure Statement

2. The information disclosure statement filed January 26, 2004 has been considered.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Sadao et al. (JP 09-328444).

Sadao et al. teach a composition comprising trichloroethane and a stabilizing amount a compound, which contains the pyperidine-1-oxyl group (see entire document). The amount of the stabilizing compound to be used is 0.05 to 200ppm (see paragraph 0017).

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Durchleiter et al. (Dansk Tidsskrift for Farmci, 1964, 38(4), 77-88).

Durchleiter et al. teach a composition comprising trichloroethane and a stabilizing (1%) amount of EtOH (see abstract).

Application/Control Number: 10/648,972 Page 3

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. The factual inquiries set forth in *Graham* v. *John Deere* Co., 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 - 1. Determining the scope and contents of the prior art.
 - 2. Ascertaining the differences between the prior art and the claims at issue.
 - 3. Resolving the level of ordinary skill in the pertinent art.
 - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 9. Claims 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mori et al. (Jpn. J. Toxicol. Environ. Health, 1993, 39(4), 317-323).

Mori et al. teach separation of recovery of 1,1,1-trichloroethane from a composition comprising a stabilizer (see abstract).

Application/Control Number: 10/648,972

Art Unit: 1621

Claims 13-16 are objected to as being dependent upon a rejected base claim, but 10.

would be allowable if rewritten in independent form including all of the limitations of the base

claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's 11.

disclosure. Izumi et al. teach separating and recovering trichloroethane using silica.

Any inquiry concerning this communication or earlier communications from the examiner 12.

should be directed to Rosalynd Keys whose telephone number is 571-272-0639. The examiner

can normally be reached on M and F 3:00-8:00 pm and T-R 5:30-10:30 am.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Johann Richter can be reached on 571-272-0646. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR system,

see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866/217-91,97 (toll-free).
